Comments: (If possible, please reference section number and/or page number in document if applicable.)

1 Fair and foremost, nuclear power, in itself, must
be phased out for the reason that an
insufficient study was done concerning
the disposal of its waste.

2 Transporting spent fuel rods in casks
by rail or highway has been studied and
proven to be unsafe.
Even transporting waste by private roads
are not feasible. Such private roads
should exclude all other traveling on such
roads and should be constructed away
from any towns or occupied areas. Such
roads are hazardous in case of earthquakes,
hurricanes, lightning and floods.

Ruthwell, Jeffrey, Stanford University, California

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
